

Sub E1  
DE  
Cont

(ii) a second layer comprising microcellular polyurethane elastomers having a density of from 300 to 700 kg/m<sup>3</sup>, a tensile strength to DIN 53571 of from 3 to 8 N/mm<sup>2</sup> an elongation at break to DIN 53571 of from 350 to 550%, a tear propagation resistance to DIN 53515 of from 8 to 30 N/mm and a rebound resilience to DIN 53512 of from 50 to 60%, wherein said molding comprises the reaction product of (a) isocyanates with (b) isocyanate reactive compounds, where the ratio of isocyanate groups in (a) to isocyanate reactive groups in (b) is greater than 1.06:1.

DE  
Sub E2

19. (Amended) A composite element comprising:

i) a thermoplastic polyurethane molding having a thickness of from 2 to 10 mm and

ii) a microcellular polyurethane elastomer layer bonded to at least one surface of said molding.

Please cancel Claim 21, without prejudice. ✓

DE

22. (Amended) The composite element of Claim 19 wherein said elastomer layer is bonded to an inner surface of said molding.

23. (Amended) The composite element of Claim 19 wherein said elastomer layer is bonded to an outer surface of said molding.
